CLAIMS

1	1. A method of controlling at least one production device for producing a
2	television show, comprising the steps of:
3	establishing a plurality of states of the at least one production device, each state
4	corresponding to at least one operation executable by the device;
5	storing the states of the at least one production device as corresponding memory
6	objects which upon execution cause the one production device to execute the at least one
7	operation, which results in generation of a scene
8	responsive to selection of each memory object, actuating at least one actuator to
9	control an operation of the at least one production device in accordance with the at least one
10	operation associated with that state memory object.
1	2. Apparatus for controlling at least one production device for producing a
. 2	television show, comprising the steps of:
3	means for establishing a plurality of states of the at least one production device, each
4	state corresponding to at least one operation executable by the device;
5	means for storing the states of the at least one production device as corresponding
6	memory objects which upon execution cause the one production device to execute the at least
7	one operation, which results in generation of a scene
8	means responsive to selection of each memory object, actuating at least one actuator to
9	control an operation of the at least one production device in accordance with the at least one
10	operation associated with that state memory object.
